## **SYMMONS INDUSTRIES INTRODUCES THE DEGAS™ BATH COLLECTION**

**Braintree, MA, February 23, 2011**- Symmons Industries introduces the Degas™ Collection, the newest addition to their family of premium bath suites. The Degas Collection will be showcased at this year's upcoming Kitchen & Bath Industry Show in Las Vegas, April 26-28<sup>th</sup>.

The new Degas Collection is a true transitional design that compliments any bath décor. Inspired by the artwork of Edgar Degas, the new collection features elegant lines complimented by subtle details. The original pieces created by the famous French artist Degas, focused on the harmony of line and the continuity of contour, much like the details captured in the Degas Collection by Symmons.

"Our customers are seeking bath products that are flexible in their design and allow for the homeowner to incorporate his or her personality into the overall look of the bath. The Degas Collection is a transitional design which makes it a perfect backdrop to the stylistic interpretations made by the homeowner" explained Beth Mercurio, Vice President of Marketing for Symmons Industries.

The Degas Collection, available to order in June, includes a widespread lavatory faucet, hand spray, shower and tub/shower system. Homeowners can complete their bath design with the coordinating Degas bath accessories. All Degas products will be offered in polished chrome, satin nickel and oil rubbed bronze.

"We wanted to offer this collection in Oil Rubbed Bronze because it is reminiscent of the artist's bronze ballerina sculpture created in 1881. The depth of color and texture in the finish brings out the intricate details of the Degas collection" added Mercurio.

### **About Symmons Industries**

Since 1939, Symmons Industries has been a premier manufacturer of commercial and residential plumbing products. Symmons offers a variety of durable, reliable and beautifully designed plumbing fittings for a variety of applications. Symmons full line of products can outfit a complete property or home from the basement to the master bath suite. The Symmons pressure-balancing, anti-scald shower valve, which has been an industry standard for bathing safety, in combination with its expansive line of premium products for kitchen and bath, makes Symmons truly the smart choice in plumbing for the home or commercial property. Symmons continues to innovate within the custom fittings category, creating distinctive design solutions for premium

hospitality and condominium projects. Property managers and homeowners alike can be confident that they have made an investment in their property by installing a Symmons product and they can rely on Symmons for all their plumbing needs, from the valve behind the wall to the bath accessories on the wall.

Headquartered in Braintree, MA, Symmons is a privately-held company with regional sales offices and local representatives located throughout the United States and Canada.
