

HydaPipe® Shower Systems

Out of Hiding After 60 Years!

After years in hiding, the HydaPipe designs were uncovered and brought back to the shop for a full restoration.

In 1959, Symmons® invented HydaPipe®, the world's first prefabricated stainless-steel commercial shower system. Since then, HydaPipe has been the standard for commercial shower solutions in athletics facilities, beach and pool clubs, correctional facilities, schools, and other high-use public shower rooms.

The original HydaPipe design is virtually indestructible and has remained largely untouched for more than 60 years. Symmons has engineered major updates for 2021 to bring HydaPipe into the modern era. With enhancements to improve performance, simplify installation, and reduce maintenance, the new HydaPipe should also set the standard for the next 60 years.

WE HAVE THE METAL... AND THE METTLE!

All HydaPipe components are made of brass, bronze, or stainless steel and can take a beating. The shrouds are made of 18-gauge 304 stainless steel that's easy to clean but hard to damage. Our all-brass SafetyMix, ShowerOff, and Temptrol shower valves always put the metal to the pedal with their legendary reliability.

THE HEAD OF ITS CLASS

All HydaPipe models now share a common bracket and code-compliant showerheads. The universal soap dish has been redesigned to install in both left and right configurations, and the sloped top cap prevents water, bacteria, abandoned toiletries, or other unsavory characters from hanging around up there.

OVERHAULED UNDER THE HOOD

The 900-Series HydaPipe has the latest version of the Temptrol valve for high performance and smooth handling. The 800- and 900-Series have redesigned service stops for easier front-facing access and 100% shutoff control.

ADA COMPLIANT: HydaPipe turns easily with lever handle operation.

EASY TO ORDER: HydaPipe is now easier to order with the Symmons Modified Shower Trim system.

All HydaPipe shower systems are made right in our Braintree, Massachusetts factory.
