

## CASE STUDY

# Symmons® Design Studio™ A Portfolio of Exclusive Elegance

## The Waldorf Experience

When the famed Waldorf Astoria® decided to renovate their bath spaces, they turned to Design Studio from Symmons to create an exclusive palette of custom-designed shower valves, faucets, and bath accessories, made right here in the US. The experts from Design Studio proposed a series of one-of-a-kind product suites that reflected the stately history of the Waldorf itself. The resulting design options spanned Art Deco to Modern aesthetics in a variety of unique finishes, with the benefits of ADA accessibility and functionality.

### Ideation

It all starts with an idea and a meeting with our Design Consultants. Think, sketch, rough it out, and get those creative gears turning.

### Vision

Our Designers provide photo realistic renderings, Architectural & Design (A&D) specifications. We will ship 3D plastic models to you at no charge to help you visualize the ideal solution.

### Definition

Our Engineers take that vision and build in the product definition to finalize manufacturability. Metal mock-up samples are delivered to you.

### Creation

Our Operations team creates your equity-building, unique products on time and on budget.

## HIGHLIGHTS

- ✓ The safety and reliability of the Temptrol® valve, the leader in pressure-balancing shower control.
- ✓ High-quality bath and plumbing products designed for ADA accessibility and safety.
- ✓ All Symmons commercial products are covered by our 10-Year Commercial Warranty.
