

Ligature-Resistant Shower and Diverter Valve Trim

- ✓ Shower valve, handle & escutcheon plate are designed to help avoid injury by ligature.
- ✓ Designed for use in specialized care settings to minimize the opportunity for patient/user self harm. The handles and escutcheons are designed to reduce the likelihood that the trim can be used for hanging.
- ✓ Handle and escutcheon design allow for easy temperature adjustment with familiar controls and intuitive markings.
- ✓ The Lig-Res™ trim is used with the Symmons Temptrol® pressure-balancing valve to provide industry-leading protection from scalding.
- ✓ The diverter trim is used with the proven-quality Symmons diverter valve to provide years of maintenance free operation.
- ✓ Easy 3 screw installation
- ✓ Vandal-resistant handle attachment
