

Temptrol®

# Balanced Precision!

**The safety of pressure-balanced protection with the durability of brass**

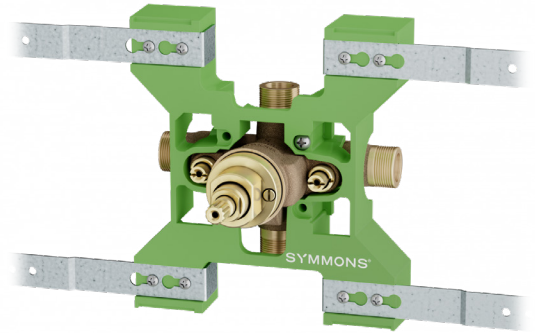

Built on 80 years of innovation, the **Symmons Temptrol** has been the benchmark for anti-scald, pressure-balancing shower valves since 1968. The solid brass and bronze TA-10 flow control spindle provides scald protection by automatically balancing the hot and cold water pressure to accommodate for building water pressure fluctuation.

Temptrol valves are ASSE 1016 certified and are listed down to 1.0 GPM to comply with regulations for 1.2 GPM showerheads. The control spindle provides 360-degree rotation for full temperature control, and the brass cap assembly features a temperature limit stop that's easy to set without shutting down the water system.

Temptrol valves are designed with all ports on a common plane and integrated stringer mounts, and they can be modified for back-to-back installations by simply installing optional reverse seats.

Other options include factory-installed fittings for virtually any piping material found in the field today, such as copper sweat, CPVC, IPS, PEX, and ProPress®. **The Temptrol Rapid Install™ Bracket** is available for easier and more accurate mounting.

**TEMPROL HAS THE  
METTLE, AND THE  
METAL!**

Valve body and spindle are made from dezincification-resistant semi-red brass and bronze, with a stainless-steel piston and housing that instantly balances fluctuating water pressure.

**SIMPLE TO REPAIR  
AND RENEW!**

Simple repair with a genuine Symmons TA-10 spindle takes less than 5 minutes and automatically resets and renews the warranty—a full 10 years for commercial and lifetime for residential!

**MADE IN OUR  
MASSACHUSETTS  
FACTORY**

All Temptrol valves are machined right in-house with our state-of-the-art CNC machining to exact tolerances for consistent, reliable operation, year after year.

# A Totally Tempting Warranty

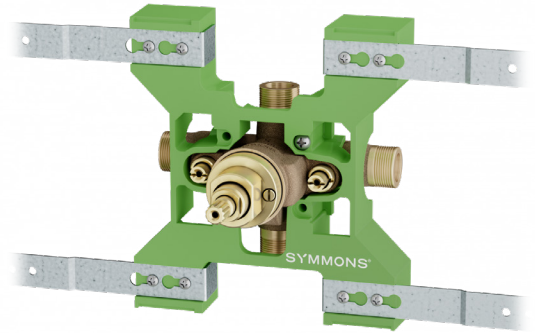

**Renew the warranty on any Temptrol in 10 minutes!**

It's been said that you can judge a product by its warranty, and here at Symmons, we agree. We stand behind every product we make, and our warranty reflects our commitment to quality and durability.

Take our famous Temptrol valve, for example. Like every Symmons product, it has a limited lifetime warranty for residential use, and an industry-best 10-year commercial warranty. No other valve even comes close to its quality or its warranty.

But here's an added bonus: when you rebuild a Temptrol valve—any Temptrol valve—that already-amazing warranty coverage automatically renews! Just install a new genuine Symmons TA-10 spindle with a new TA-4 seat kit and you're right back to square one with a brand-new warranty.

**THE BEST RESIDENTIAL WARRANTY...PERIOD!**

Temptrol in a residential home? It's warrantied for life! And not just your life—that warranty is transferrable to the next homeowner as well. It's a win-win all around!

**RENEW THE WARRANTY IN 10 MINUTES!**

In just about 10 minutes, you can rebuild a Temptrol and automatically renew the warranty—a full 10 years for commercial and lifetime for residential!

**MADE IN OUR MASSACHUSETTS FACTORY**

All Temptrol valves are made of corrosion-resistant semi-red brass, bronze, and stainless steel, right here in our Braintree, MA factory!
