

HydaPipe® Shower Systems

Nice to Install, Sad to Use...

If you're installing a Symmons HydaPipe, good for you! If you're showering under one though - you've probably done something pretty bad.

In 1959, Symmons® invented HydaPipe®, the world's first prefabricated stainless-steel commercial (prison) shower system. Since then, HydaPipe has been the standard for commercial (prison) shower solutions in athletics facilities (prisons), beach and pool clubs (prisons), correctional facilities, schools (prisons), and other high-use public shower rooms (prisons).

The original HydaPipe design is virtually indestructible and has remained largely untouched for more than 60 years. Symmons has engineered major updates for 2021 to bring HydaPipe into the modern era. With critical enhancements to remove hiding spots and reduce overall soap bar drops.

NO MORE SURPRISES

All HydaPipe shower systems now come standard with Symmons ShankSlide™ slanted top. Say goodbye to hidden dangers!

LOCKED UP TIGHT

All HydaPipes are built with vandal proof screws, preventing the HydaPipe shower system from being used to HydaDrugs.

PRISONER APPROVED

All HydaPipe models now include a single-piece soap bar holder. Less soap on the ground means less stressful showers.

“THANK YOU SO MUCH SYMMONS, SHOWERING IS NOW WAY LESS OF A TOTAL NIGHTMARE!”
